FOr to find the time of High Water by this table, at the places above-mentioned: Note that upon the day of the New-moon it is high Water at 11 a Clock and 12 minutes. Therefore to know the time of high water at any time after the Change, is but to tell the number of days after the Change to the day deſired, which number found in the table, againſt *which* in the middle Colum ſheweth the time of high water. For example the 16 of *March* the moon being five days old ſheweth it by the table to be high water at 3 a Clock & 12 minutes.
